# D 2 1 2 C O S M E T I C S

- Fashion for natural, organic and green products has appeared a few years ago with the increase of consumer awareness about their health, life style and taking care of nature.
- Development of a slow-life-trend is still observed and it naturally spreads to various areas of life. After slow-design, slow-travel, slow-food there came a time for cosmetics.
- Consumers are eager to reach for cosmetics based on natural components, safe for health and beauty, and environment-friendly.

In USA, where the eco-goods market is worth 40 billion dollars, they call this phenomenon: LOHAS (lifestyle of health and sustainability).

#### ACCORDING TO THE REPORT OF MINTEL BEAUTY PERSONAL CARE GLOBAL TRENDS 2018

- **25%** german consumers of natural comsetics choose tchem because of believe that they are better for the environment
- **33%** cosmetics users in Italy choose natural cosmetics.
- **50%** consumers in United Kingdom buying care products are looking for those made from natural ingredients.

The natural cosmetics market is one of the fastest growing segments of the beauty industry and according to Persistence market research, its value in 2024 will amount to 22 billion dollars.

To the natural cosmetics reach not only people looking for healthy and unprocessed food, but also those who enjoy using natural cosmetics and want to use them.

For many people <u>BEING GREEN</u> is rather a lifestyle then only a trend.

The philosophy of natural cosmetics is connected with CSR - social responsibility of business, care for local societies and the environment, from which raw materials for cosmetics are obtained.

According to report about **expectation of natural and organic cosmetics' consuments**, published by NATRUE, in the selection of natural cosmetics, women are guided by three main factors:

risk avoidance 65%,

protection and care fpr the environment 18%,

17% buy natural cosmetics, because it is consistent with them, with their values and philosophy of life.

The modern world significantly limits our everyday contact with nature.

People move with the use of motor vehicles, work closed in air-conditioned rooms, also at home, in free time they prefer to lie on the couch and watch TV, than to go out into the fresh air.

#### The tie with nature is indispensable for functioning of the whole organism!

Our body is coupled with the biological rhythm of the earth, the seasons, of days and nights - that's why contact with nature relaxes, regenerates and positively stimulates. Unfortunately, most of us have a shortage of contact with nature, what makes us more vulnerable to stress and our life in constant tension - physical and mental.

Natural cosmetics are designed to restore your upset relationship with nature and provide the substances that you cannot provide you by yourself.

Natural cosmetics contain only ingredients of organic origin. Usually, they are not ingredients of animal origin - if they are, any animal cannot suffer during their sourcing, such as milk or honey, are allowed.

Due to such restrictions regarding the raw material composition of these products, they are also called green, ecologic or organic cosmetics, often with the prefix "bio" or "eco".

# FACTS

Natural cosmetics stimulate and support the skin in its natural physiological functions, without interfering with the natural rhythm and renewal processes.

Thanks to the friendly and delicate composition, they do not cause irritation, they perfectly moisturize, nourish and soften the skin.

They do not contain substances that could endanger human health, so they are safe for people with sensitive skin susceptible to irritation, as well as those with various dermatological problems.

WHAT SET NATURAL

**COSMETICS APART?** 

Natural cosmetics can be used by everyone - this is confirmed by positive research results!

# Restoration of natural skin functions and stimulation of self-healing processes.

The effects are not visible as quickly as in the case of synthetic cosmetics, however they are much more durable

Natural cosmetics do not fight with the original processes taking place in the skin but actively support them!

These preparations do not damage the skin's natural protective coat, and allow free circulation of all necessary substances.

#### WHAT NATURAL COSMETICS TASK IS?

# FACTS

The determinant of skincare cosmetic effectiveness is its positive effect on the skin.

What distinguishes natural cosmetics from conventional cosmetics is primarily the composition of the product.

Botanical Flow

# CONTAINS 95% NATURAL INGREDIENTS

Delía

COSMETICS

This is one of the most important cosmetics in a cosmetics case. It is quickly and deeply absorbed by skin cells, provides them with a dose of active ingredients, and cope with many problems faster and more effectively than a cream or gel. The skin immediately receives the necessary dose of active ingredients.

# **HOW TO USE**

- 1. As a serum, directly on cleansed skin
- 2. To enrich your favorite cream add a few drops.
- 3. As a mask apply 10-12 drops on the face and let it absorb.
- 4. As a makeup primer.
- 5. To enrich makeup removal applying a few drops on a cotton rounds.
- 6. To protect the face from wind and frost.
- 7. To stimulate the skin's natural ability to regenerate through an oil massage.

ATTENTION! Can be used directly on the face and / or as an addition to the cream
